DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 12-17 are, drawn to practice devices, classified in class 473, subclass 422.
- II. Claims 9-11 are drawn to goals, classified in class 473, subclass 415.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a Flying disk goal . See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to W. Nitkin on August 16, 2004 to request an election to the above restriction requirement, but did not result in an election being made. This paper is being mailed for review. The number provided on the application 617- 232-2854 was not in service and there was no answer at the listed number for the attorney - 617-964-2300.
